## Consider Copper

WARM METALLICS ARE MAKING A COMEBACK IN HOME DECOR

BY PAM STASNEY

Warm metallics, especially copper, is a hot trend in home decor. With its reflective sheen and rich tone, the metal instantly injects warmth into a space. From light pendants and furnishings to accessories, hints of copper add a touch of glamour to any room.

"Nature-inspired design trends are hot for 2015, and copper acces-

sories are a natural choice to add a warm glow to any setting. I love to mix metallic copper accents with modern rustic interiors that feature natural jute rugs, live edge tables and linen upholstery. Copper is classic, a little retro and a fresh way to update your home this spring," says Tara Wilke, owner of McNabb & Risley in Thiensville.
